

Issue 2, June 2019

Check out the FALK outcomes!

FALK has developed a set of informative and educational language products aimed at making healthcare services more accessible for migrants. The products are included within a First Aid Language Kit which can be used for developing and upgrading language skills on medical issues in the host languages of 6 EU countries – Turkey, Bulgaria, Spain, Cyprus, the Czech Republic and the UK.

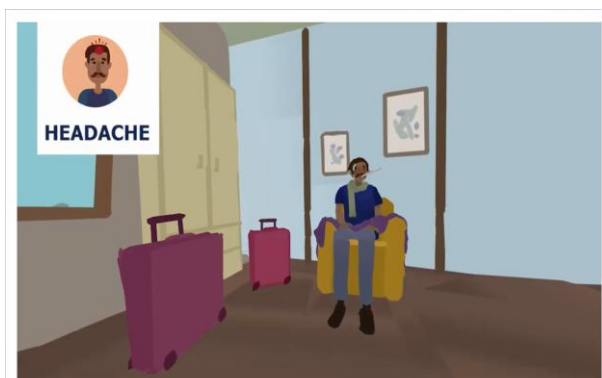

The separate elements of the Kit are available on the online platform of the project www.falkproject.eu and include:

MEDICAL LANGUAGE PYRAMID

The Medical Language Pyramid is a word and phrase glossary providing medical terminology related to specific health problems of migrants. The Pyramid is divided into 6 topics as priority medical areas for addressing migrants' health needs – Injuries, Communicable diseases, Non-communicable diseases, Mental health, Health problems specific to women, Travel and weather-related health issues.

The Pyramid is available in 12 languages – English, Turkish, Bulgarian, Spanish, Czech,

Greek, Arabic, Farsi, Georgian, Russian, Ukrainian and Romanian.

MEDICAL LANGUAGE STUDY-VIDEOS

The Medical study-videos provide visual and audio recreation of different medical scenarios for (self) language learning purposes. They are divided into the 6 priority medical topics and linked to the language information contained in the Medical Language Pyramid.

The videos are available in 6 languages – English, Turkish, Bulgarian, Spanish, Czech and Greek.

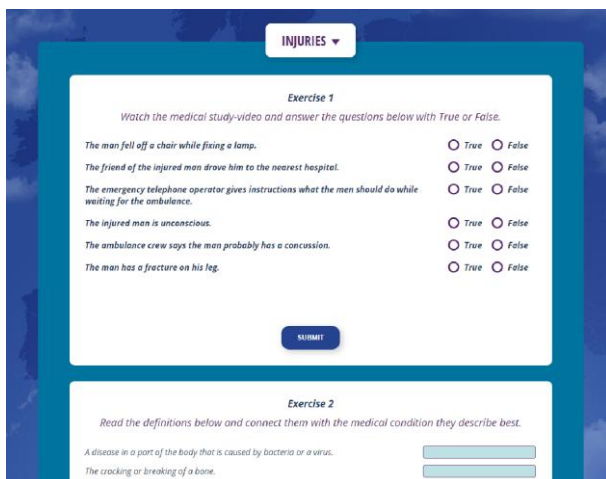

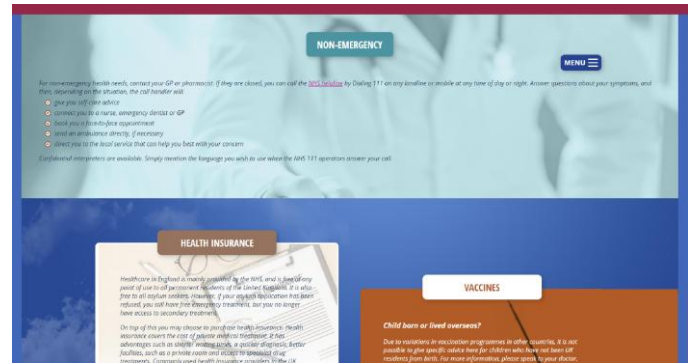

VIRTUAL MAP OF THE HEALTHCARE SYSTEMS

The Virtual Map provides country-specific information on the healthcare systems of the host countries – Turkey, Bulgaria, Spain, Cyprus, the Czech Republic and the UK. The Map is divided into topics and contains information specific for the respective country related to Emergency, Non-emergency, Health insurance, Vaccinations, Dental care, Sexual health, Child birth and care and Preventive healthcare.

A total of 6 maps have been developed – one per country, and they are available on the online platform of the project in the

national languages as well as in different migrant languages.

TESTING GROUND

The Testing Ground provides an opportunity for learners to practice language information in 6 languages – English, Turkish, Bulgarian, Spanish, Czech and Greek. It is divided into the 6 priority medical topics and each of them includes exercises related to the information provided in the Medical Language Pyramid and the Medical Language Videos. The exercises are focused on testing language skills like listening comprehension, reading comprehension, vocabulary, etc.
